POND
AN
ALMANACK
For the Year of our
LORD GOD
1698.

BODLEIAN

Being the 2d after Biſſextile or Leap-year, and from the Worlds Creation at the Spring 5701 years Compleat.

Amplified with many good things, both for pleaſure and profit: and fitted for the Meridian of *Saffron-Walden* in *Eſſex*, where the Pole is elevated 52 degrees and 6 minutes above the Horizon.

And may ſerve indifferently for any other place of this Kingdom.

CAMBRIDGE,
Printed by *John Hayes*, Printer to the Univerſity, 1698.

The vulgar Notes and moveable Feasts for this Year 1698, in both Accounts *viz.*

Julian or English.			*Gregorian* or Forreign.	
	8	The Golden Number	8	
	B	The Dominical Letter	C	
	28	The Epact	18	
	27	The Cycle of the Sun	27	
March	6	Shrove-sunday	Febr.	9

Novemb.	27	Advent-sunday	Novemb.	30

The Suns entrance into the four Cardinal Signs.

HE enters ♈, *March* the 11th day, 44 minutes past 4 in the morning, and then begins our Spring Quarter.

He enters ♋, *June* the 12th, 14 minutes past 6 in the morning, and then begins our Summer Quarter.

He enters ♎, *September* the 13th, 12 minutes past 10 in the morning, and then begins our Autumn.

He enters ♑, *December* the 12th, 4 min. past 10 at night, and then begins our Winter Quarter.

Times prohibiting Marriage.

MArriage comes in on the 13 day of January, and at Septuagesima Sunday it is out again untill Low-sunday; at which time it comes in again, and goes not out till Rogation-sunday: thence it is forbidden untill Trinity-sunday, from whence it is unforbidden till Advent-sunday: but then it goes out, and comes not in again till the 13 day of January next following.

The

The beginning and ending of the Terms.

Hillary Term begins January 24, ends February 12.
Easter Term begins May 11, ends June 6.
Trinity Term begins June 24, ends July 13.
Michaelmas Term begins Octob. 24, ends Novemb. 28.

A Table shewing how many years Purchase a Lease or Annuity to endure for any number of years under 30, is worth presently, at interest upon interest, at six in the hundred, and shewing also how to discern any Lease in being, and the true value of the Reversion after any number of years.

Years of Lease	Years.	Months.	Dec. parts.
1	0	11	0
2	1	9	9
3	2	8	1
4	3	5	7
5	4	2	5
6	4	11	0
7	5	7	0
8	6	2	5
9	6	9	6
10	7	4	3
11	7	10	7
12	8	4	6
13	8	10	3
14	9	4	6
15	9	8	5

The Use and Explanation of this Table.

THE first Column at the left hand sheweth the years of a Lease, or Annuity, and right against each year are the years, months, and decimal parts of a months purchase that such a Lease or Annuity is worth.

Example.

Suppose a Lease or Annuity to continue 18 years, and you would know how many years purchase it is worth in ready mony, look in the Column of the years of a Lease, for 18 years, and against the same you shall find 10, 9, 9. which shews such a Lease to be worth 10 years, 9 months, and 9 ten parts of a months purchase. So that the yearly rent being 12 pound, the value will be thus found.

	£	s	d
10 times 12 is	120	0	0
12lb in 9 mon. is	9	0	0
in 9 parts is	0	18	0
the value	129	18	0

But if you buy the Reversion of a Lease now, as suppose a Lease of 20 years continuance, and you commence not till 5 years be past, in this and such like cases, look for the present worth of the Lease, as this of 20 years, which will be found worth 11 years, 5 months, 7 tenths of a months purchase then look the present worth of a Lease of 5 years, which will be found worth 4 years, 2 months, 5 tenths, take this out of 11 5. 7 and there remains 7. 3. 2. which are 7 years, 6 months, 2 tenths of a months purchase; and so much is the Reversion of the Lease of 20 years, after 5 years worth be expired.

Years of Lease	Years.	Months.	Dec. parts.
16	10	1	3
17	10	5	8
18	10	9	9
19	11	1	3
20	11	5	7
21	11	9	3
22	12	0	5
23	12	3	6
24	12	6	6
25	12	9	4
26	13	0	0
27	13	2	5
28	13	4	9
29	13	7	1
30	13	9	2

Wee ſuffer day continual, and the Snow
Makes a little night become noon day now:
We hear of ſome incryſtall'd, ſuch as have
That which procur'd their death, become their grave.

January 1698.

Fine ſeaſonable weather begins the year.

Frosty and cold about the full moon.

Towards the end more cold with ſnow or rain.

Uncover as yet roots of Trees where ablaqueation is requiſite, Plant Quick-ſets, and Tranſplant Fruit Trees, if not finiſhed. Set Vines, and begin to prune the old, Prune the branches of Orchard fruit Trees, eſpecially the long planted, and that towards the decreaſe: but for ſuch as are newly planted, they need not be disbranched till the ſap begins to ſtir: In this work cut off all the ſhoot of *Auguſt*, unleſs the nakedneſs of the place incline you to ſpare it:

You may now begin to Nail and Trim your Wall fruit: Cleanſe Trees of Moſs, &c. the weather moiſt. Gather Cyons for Graffs before the Buds ſprout, and about the latter end Graff them in the ſtock, Pears, Cherries, and Plums. Set Beans, Peaſe, &c. In this month forbear Phyſick, or to let blood, unleſs neceſſity conſtrain; beware of taking cold, for Rheums and Flegm do much increaſe this month.

February hath xxviii days.

New moon the 1 day, 16 min. past 1 in the morning.
First quarter the 7 day, 22 min. past 4 afternoon.
Full moon the 14 day, 2 min. past 10 at night.
Last quarter the 22 day, 33 min. past 11 at night.

February 1698.

In this month remove Graffs of former years Grafting, Cut and lay Quick-sets, Plant Vines as yet, and Hops, and fruit that grows on bunches. Set all sorts of kernels and strong Seeds, also sow beans, Pease Corn-sallet, Marigold, Anny-seeds, Radish; Parsnips, Carrots, Onions, Garlick. Rub Moss off your Trees after a soaking rain, and scrape and cleanse them of Cankers. Cut off the Webs of Caterpillars from the tops of Twigs and Trees to burn. Parsly, Spinage and other hardy Pot-herbs may now be planted. Half open your passages for the Bees, but continue to feed weak Stocks.

Be still sparing in Physick, or to let Bloud without necessity, and be carefull not to catch cold when the weather flatters with warmth.

March hath xxxi days.

You may as yet cut Quick-ſets, and cover ſuch Tree-roots as you laid bare in *Autumn*; ſow Oats, Barly, Parſnips, Onions, Carrots, Mellons, Cucumbers, &c. Graff all this month, beginning with Pears, and ending with Apples, unleſs the Spring prove extraordinary forwards. Prune laſt Years Graffs, and Cut off the heads of your budded Stocks. It were profitable now alſo to top your Roſe-Trees a little with your knife near a leaf bud, and to Prune off the dead and withered branches, keeping them lower then the cuſtome is, and to a ſingle Stem.

Slip and Set Sage, Roſemary, Lavender Thyme, &c. Mid-March dreſs up and ſtring your Straw-berry beds. It is now ſeaſonable to purge and let bloud about the 20 of this month, there are ſuch changes in the Air, yet it's generally very ſickly; and therefore be ſpecially carefull of your health at that time.

April hath xxx days.

First quarter the 7 day, 8 min. past 10 in the forenoon.
Full moon the 15 day, 19 min past 6 in the morning.
Last quarter the 23 day, 55 min. past 7 beforenoon.
New moon the 30 day, 14 min. past 2 in the morning.

Now in this pleaſant month of *May*,
The earth is crown'd by the Goddeſs *Flora*,
With divers colours rich and gay;
And Birds do welcome in *Aurora*.

May 1698.

Fine pleaſant weather begins the month.

Sow ſweet Marjoran, Thyme, and thoſe Herbs and Plants which are moſt tender; now diſtil Plants for waters, Spirits, &c. Continue weeding before they run to ſeeds, weed alſo your Hop Gardens and Corn, and walk in the Fields and Gardens early in the Morning,

Windy and cold blaſts with battering ſtorms of rain and hail.

Now ſet your Bees at full liberty, look out often, and expect ſwarms. Plant your Carnations and Gilly-flowers after mid-day about this ſeaſon. Plant alſo your Stock Gilly-flowers in Beds at full Moon. Whey Clarified with Sage, Scurvy-graſs Ale, and Worm-wood Beer are wholeſom drinks.

Fine growing weather with thunder, and ſhowers follow.

First quarter 5 day, 32 min. past 5 in the morning.
Full moon the 13 day, 40 min. after 12 at noon.
Last quarter the 21 day, 59 min. past 2 in the morning.
New moon the 27 day, 58 min. past 4 in the afternoon.

27 able weather
28 concludes the
29 month.
30

Sow Lettice, Chervile, Radish, &c. to have young and tender salleting. Gather Herbs in the Full Moon to keep dry; they keep and retain their vertue and sweet smell better, if dryed in the shade, than in the Sun, whatever some pretend. Set Rosemary and Gilliflowers 3 or 4 days after the Full, and they will not run to seed. Look to your Bees for Swarms and Casts, and begin to destroy Insects in your Garden with Hoofs, Canes, and tempting Baits; gather snails after Rain, &c.

Thin and light Diet, and chast thoughts tend to health: Lie not unadvisedly on the ground, nor over hastily drink.

First quarter the 5 day, 5 min. before 1 in the morn.
Full moon the 13 day, 20 min. past 2 in the morn.
Last quarter the 20 day, 36 min. past 8 in the morning.
New moon the 27 day, 51 min. past 1 in the morning.

In this month, fallow your Land for Wheat, pull up Hemp that is ripe, get Rue and Wormwood to drive away Fleas and Moths; dry Flowers in the ſhade and then Sun them a little for fear of corruption; perfume your houſe with ſweet ſavours, and defend your ſelf from ſtinks in the ſtreet.

Forbear ſuperfluous drinking, but eat heartily; uſe cold Herbs and Meat, abſtain from Phyſick. Perfume your houſe every morning with Tar, uſe Carduus Benedictus boiled, and drink faſting.

First quarter the 3 day, 40 min. past 5 in the afternoon.
Full moon the 11 day, 25 min. past 2 in the afternoon.
Last quarter the 18 day, 25 min. past noon
New moon the 25 day, 52 min. past noon.

The earth her fruit to man resigneth,
The Sythe and Sickle naked make her,
This left (her friend) the Sun declineth,
And his warm rays do soon forsake her.

August 1698.

Windy and bluftering weather at the beginning.

Indifferent good harveft weather about this time.

Windy and dry.

Some black clouds with thunder and rain.

This month reap Wheat and Rye, cut down your Oats and Barley that is ripe, gather Garden-ſeeds, ſow Corn-ſallet, Marigolds, Lettice, Carrots, Parſneps, Turneps, Spinage, Onions: Likewiſe now pull up ripe Onions and Garlick.

This month uſe moderate diet, forbear to ſleep preſently after meat, for that brings Opilations, Headach, Agues, and Cathars, and other Diſtempers of the ſame kind; take heed of ſudden Cold after great Heats.

September hath xxx days.

First quarter the 2 day, 36 min. past 11 in the foren.
Full moon the 10 day, 10 min. past 1 in the morning.
Last quarter the 16 day, 1 min. past 5 at night.
New moon the 24 day, 29 min. past 2 in the morning.

Now *Sol* the Northern Pole forſaketh,
Makes days and nights of equal length;
To cheer the ſouth great haſt he maketh,
Heat now abates; cold gathers ſtrength.

September 1698.

Temperate as to heat.

Windy and ſome rain.

Gather now (if ripe) your winter Fruits, as Apples, Pears, Plums, &c. to prevent their falling by the great winds. Alſo gather your windfalls from day to day: do this work in dry weather.

Miſty and cold raw mornings about this time.

Set Artichoaks, ſow ſeeds for winter Herbs, gather Hops, about the full of the moon the weather being dry, cut Quick-ſets, ſow Wheat and Rye, kill Bees, make Verjuce, ſow Parſnips and Carrots, remove and ſet ſlips of Flowers, ſet Roſes, Strawberries and Barberries, &c.

Cloſe dark weather, and cold with ſome wet.

October hath xxxi days.

First quarter the 2 day, 53 min. past 5 in the morn.
Full moon the 9 day, 2 min. past noon.
Last quarter the 16 day, 3 min. past 2 in the morning.
New moon the 23 day, 24 min. past 7 at night.
First quarter 31 day, 26 min past 11 at night.

Thick mists and clouds, are now combining,
To darken *Sol's* weak oblique rays.
Who being far from us declining,
Causes cloudy, moist, cold and short days.

October 1698.

Mild weather for the time of the year.

Remove young Plants and Trees in the new of the moon, and about the full of the moon, gather such fruit as you left ungathered the last month; set all kind of Nuts and Acorns, and cut your Rose trees but once in two years, if you would have store of Roses.

Windy and some rain.

Cold winterly weather but soon alters.

Provide warm Cloaths now, and consult as well the Taylors as Physitians.

Tempestuous with some rain.

November hath xxx days.

Full moon the 7 day, 59 min. past 9 at night.
Last quarter the 14 day, 3 min. past 2 in the afternoon.
New moon the 22 day, 10 min. past 2 afternoon.
First quarter the 30 day, 16 min past 3 afternoon.

Old *Hyems* now his gray hairs ſhaking,
Cloathes Trees and Herbs with rain and ſnow;
A Chriſtal cruſt o'th' waters making,
When he with churliſh breath doth blow.

November 1698.

Gloomy at the beginning inclining to froſt ſoon after.

Variable and unſetled, with ſnow or rain.

Windy and cold about this time.

Very good weather for the time of the year.

In the new moon remove young Trees, ſet Crab-tree ſtocks to graft on the following Year, and at the decreaſe or old of the moon ſow and ſet early Beans and Peaſe; trench and fit ground for Artichoaks, &c. Make Mault, kill Hogs, and make Martimas Beef.

Uſe good Meat, and wholeſome Drinks to nouriſh the Blood, and be ſure to go dry of your feet; for if not (unleſs you be uſed to it) you'l be certainly troubled with Rheums, and Cold, &c. If any diſtemper afflict the Body, finiſh your Phyſick this month, and ſo reſt 'till March, unleſs neceſſity urge.

December hath xxxi days.

Full moon the 7 day, 54 min. past 7 in the morning.
Last quarter the 14 day, 48 min. past 7 in the morning.
New moon the 22 day, 37 min. past 9 in the forenoon.
First quarter the 30 day, at 4 in the morning.

The Use of the Table in Example.

King *Henry* 8 began his Reign in the Year of *Christ* 1509, *April* 22. He Reigned 37 Years, 10 months, and 2 days It is since he began his Reign 189 years compleat the 22 of *April* this year 1698. Now to know the time since the end of his Reign, before his name standing on the right hand, you shall there find 152 Years since he died, *Jan.* 28. And so of the rest.

The Anatomy of Man's Body.

The Names and Characters of the twelve Signs.

♈ Aries Head and Face	♎ Libra Reins and Loyns
♉ Taurus Neck and Throat	♏ Scorpio Secret Members
♊ Gemini Arms and Should.	♐ Sagitarius the Thighs
♋ Cancer Breast and Stomach	♑ Capricornus the Knees
♌ Leo Heart and Back	♒ Aquarius the Legs
♍ Virgo Bowels and Belly	♓ Pisces the Feet.

The Characters, Names and Nature of the 7 Planets.

♄ Saturn Cold and dry	♀ Venus Cold and moist
♃ Jupiter Hot and moist	☿ Mercury Variable
♂ Mars Hot and dry	☾ Luna Cold and moist.
☉ Sol Hot and dry	

The

The Eclipses which will happen this Year 1698. are as followeth.

There will be two Solar Eclipses, the one of them happens before the Sun's *Apogæon*, and the other after it; so that there will be no full moon Eclipse all this year.

The Sun will be Eclipsed on *March* the 31 day, about Sun-setting, and therefore invisible in *England*; nevertheless it will be a great Eclipse and happens near the place wherein the Sun is exalted.

The second *Solar* Eclipse will fall on *September* the 24 day, near four of the Clock in the morning, in eleven degrees of the Celestial Ballance. This will be likewise a great Eclipse, but invisible to the inhabitants of this Country.

The 29 day of *August* in this year, will happen a famous Conjunction of *Jupiter* and *Mars* in 22 degrees of the Celestial Sign *Scorpio*; It portends afflictions to the Northern parts of the world, chiefly places near the Sea; and occasions great Naumachies, Shipwracks, Inundations, with many various misfortunes, &c.

How to Measure Land.

First, If Land be just Square like unto the following Figure A B C D, then multiply the side in it self, and the Product is the superficial capacity. Example, suppose the square A B C D

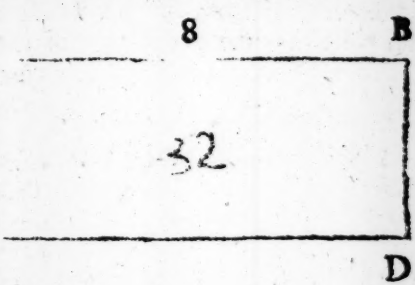
by

be a piece of Land, and the ſide thereof contain 8 Perches, therefore Multiply 8 into it ſelf, and the Product is 64; and ſo many Perches doth that ſquare Piece of Land contain. But if you cannot Multiply, you may account by your memory, ſaying 8 times 8, which you ſhall find to make 64, as aforeſaid; that is 0 Acr. 1 Rood, and 24 Perches: for 40 Perches make a Rood, 80 half an Acre, 120 Three Roods, and 160 an Acre.

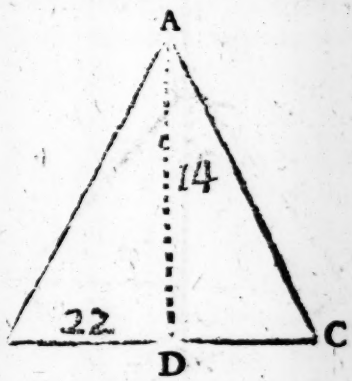
Secondly, If Land lie in the Form of a long Square or Parallelogram, having the oppoſite ſides equal, like thefollowing Figure A B C D, then multiply the longer ſide by the ſhorter and the Product is the content. Example, ſuppoſe the next Figure A B C D be a piece of Land whoſe longer ſide A B (equal to C D) is 8 Perches and the leſſer ſide A C 4 Perches, Now if you Multiply 8 by 4, the Product 32 is the content of this piece of Land in Perches: After this manner may all kind of Lands in the open fields be meaſured, for though the one end be broader then the other

yet

yet the breadth being taken at the ends, you must add them together and take the half thereof. Example, suppose the length of a Land taken in the field be 44 Perches, the breadth at one end 5, and the breadth at the other end 3 Perches, their Summ 8, the half thereof 4, is the true breadth then say 4 times 44 is 176, and that is 1 Acr. and 16 Perches for the content of that Land.

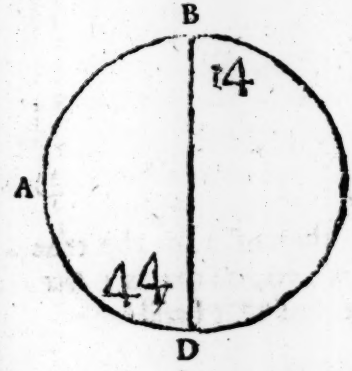


Thirdly, If Land lie in the shape of a Triangle like this Figure, you are to Multiply the Perpendicular by half the Base, and the Product sheweth the content. Example, In this Figure the Base BC is 22 Perches, and the Perpendicular AD 14, which I multiply by the half Base 11, and the Product 154 is the content of the said Land in Perches, Remembring that we call the greater side of the Triangle

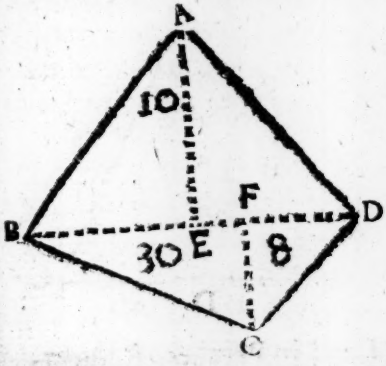


the Baſe, whereon the Perpendicular (coming from the oppoſite Angle) muſt fall ſquare-wiſe, that is making right Angles therewith.

Fourthly, If Land be juſt in the form of a Circle, you muſt Note that the proportion of the Diameter to the Circumference is as 7 to 22, therefore the Diameter being known, you may conclude the Compaſs to be Three times ſo much, and one Seventh part more. As in this Circle ABCD, the Diameter *B D* is 14, and therefore the Compaſs is 44. To meaſure this piece of Land, Multiply half the Circumference by half the Diameter, and the product is the content. Example



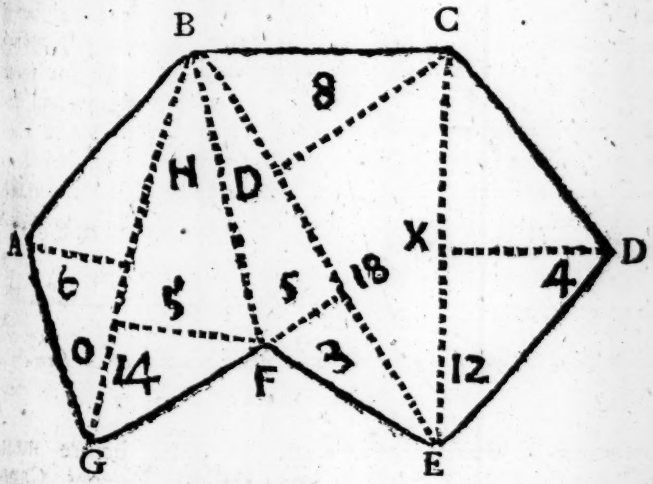
In this Circle ABCD, the Diameter or greateſt breadth thereof B D is 14, Now I Multiply 22 by 7, and the Product 145, is the quantity or content of the ſaid piece of Land.



Fifthly, When Land lies in the faſhion of this Figure A B C D, which is called a Trapezie; then Multiply the Sum of the Two Perpendiculars, by half the Baſe, and you ſhall have the ſuperficial capacity thereof. Example, Firſt I draw the Diagonal-Line B D, and thereon let fall the Perpendiculars A E and C F at Right Angles upon the Baſe B D,

D, then I measure A E, and find it 10 Perches, and C F 8, their Summs are 18, which I Multiply by half the Base B D 15. and the Product is 270 Perches; that is 1 Acre, 2 Roods, and 30 Perches for the content of the piece of Land A B C D.

Sixthly, But if Land lie irregular, and be full of Nooks and Corners, then the best way will be to divide it into Trapezies and Triangles upon the Ground, which may be done by setting up little Sticks in a straight Line between corner and corner; as in this irregular Figure noted with the Letters A B C D E F G, where I draw Lines from one Angle to another, B G, B F, B E, C E, and so is the Figure reduced into the Trapezies A B G F, B F E C, and into the Triangle C D E. Then cast up the content of 2 Trapezies, and the Triangle as before is shewed, and their Sum is the content of this irregular Figure.



Example, In the Trapezie A B F G, the Summs of the Perpendiculars A H and F O are 11, and the half of the

Baſe BG 7, which Multiplied together, make 77 for the content of the Trapezie ABFG. Again, in the Trapezie BCEF, the Sums of the Perpendiculars FS and CD are 11, and half the Baſe BE is 9, which Multiplied together make 99 for the content of that Trapezie. Thirdly, In the Triangle CDE, the half Baſe CE 6, Multiplied by DX 4, the Perpendicular maketh 24, the content of the Triangle CDE. Laſtly, Add together the 2 Trapezies and the Triangle, and the Sum is the content of the whole irregular Figure ABCDEFG.

Example, { Trapezies { ABFG 77. / BCEF 99. } / Triangle CDE 24. } Sum 200.

Theſe Three Numbers being added together, make 200 Perches, which is 1 Acre and 1 Rood; and ſo much doth this irregular Figure contain. After this manner may any ordinary Artificer or Tradeſman caſt up the true content and quality of any irregular Field whatſoever; which being ſo plain and facile, I need ſay no more thereof, conceiving there are very few but will apprehend it. As for thoſe that would underſtand the whole Art of Surveying and deſire to be furniſhed with the Geometrical grounds and Theorems of the Art, I refer them to Mr. *Wing's Geodætes Practicus*, or *Art of Surveying*, where they ſhall find much ſatisfaction, according to their deſires. And thus much briefly of Land Meaſure.

Meats good for the whole body, and of a ſanguine juyce.

Grapes, Raiſins, and Figs, be good before meat, Morning Milk drunk faſting, Pullets, Pigeons, Capers, Veal ſucking, Young Pork, Beef not above 3 years old, Rice with Almond milk, Birds of the field, green Geeſe,

Geese, Hen-Eggs new potched, nor *hard*, *Pheasants*, *Partridges*, and *Fishes* of *Stony Rivers*.

Meat good to temper Choller, and to asswage heat with moistness.

New Cheese, Rapes, Lambs, Cowcumbers, all great Fish, Lungs, Brains, inward parts of beasts, and meats full of sinewes.

How the Vertues be corroborated.

The Vertues be either Vital, Animal, or Natural; the Vital Vertues remain in the heart, the Animal in the brain, and the Natural in the Liver: the Vital virtues are governed by *Sol* and *Jupiter*, the Animal of *Luna*, *Mercury*, and *Venus*; and the Natural of *Jove* and *Venus*.

Other Vertues be also governed of the Planets, as the vertue Attractive is governed of *Sol*, the Digestive of *Jove*, the Retentive of *Saturn*, and the Expulsive of *Luna*.

Also the Signs thus govern the vertues, *Aries* and *Sagitarius* rule the Attractive, *Gemini* and *Libra* the Digestive, *Taurus* and *Virgo* the Retentive, and *Cancer* and *Pisces* the Expulsive.

Also the Vertues be ruled by the Planets thus: *Sol* the well-Spring of the vertues Vital, *Luna* of the vertues Animal, *Saturn* of the Receptive, *Jupiter* of the Augmentative, and *Mercury* of the Imaginative: Therefore when you would fortifie any of these Vertues, fortifie the Planet signifying the same and it is done.

Rules for drawing of bloud.

In letting of bloud you must know what persons are fit to bleed, and what not; and if they be fit, how is it with the person inwardly, for his complection and Age,

and outwardly for the time of the year, time of the month, day and diet.

For Complection.

For the Phlegmatick let the Moon be in *Aries* or *Sagittarius* when ye draw bloud. For the Melancholly in *Libra* or *Aquarius*. For the Cholerick in *Cancer* or *Pisces*. And for the Sanguine in any of the aforesaid: *Luna signum membrum dominans peragrante.*

For Age, Let bloud

In Youth from the change to the first Quarter. In middle age from the first quarter to the full. In elder age, from the full to the last quarter. In old age from the last quarter to the change.

For the time of the year.

The Spring is best, harvest indifferent, the rest of the year bad, and to be used but upon necessity.

For the time of the Month.

Let not bloud 3 days before or after the change, the day before and after the Conjunction of *Luna* and *Saturn*, the like of the Conjunction of *Luna* and *Mars*; Let not bloud, *Venus* and *Luna* in Conjunction, while *Venus* is combust, Let not bloud the day before and after the full Moon: the like observe, the Moon in Conjunction with *Saturn* or *Mars*. The Moon in any Aspect with *Jupiter* or *Venus*, or in a Sextile or Trine with *Sol* or *Mars* produce a fit time to let bloud: *this to the skilful may be of use.*

The

The time of the day.

The morning fasting is best, or in the evening after perfect digestion, provided the Air be temperate and the wind not south. Persons that are not fit to bleed be such as are under the age of 14 years, or more then 59 years old, or, those that are exceeding fat, or very lean. And after bleeding use no violent exercise, no Sleeping, Venery, or Gluttony.

Things good for many parts, and first for the head.

Galingal, Marjoram, Rosemary, Roses, Hyssop, Camomil, Rue and Frankinscence.

For the Heart, Cinnamon, Saffron, Cloves, Mace, Buglos, Burrage, Setnal, Rosemary, Marjoram, Musk and Nutmeggs.

For the Stomach, Quinces, Nutmeggs, Saffron, Wormwood, Coral, Mint, Cloves and Coriander prepared.

For the Eyes, Fennel, Verven, Cloves, cold water, Celendine, Eye-bright.

For the Liver, Lettice, Liverwort, Violets, Rosewater, Plantan, Fennel and Cloves.

For the Lungs, Licorish, Raisins, Almonds, Dates, Lungwort and Pennidice.

Meats hurtfull for the Teeth.

Nuts, Meats very hot, warm drink, sweet meats and drinks, Radish roots, hard meats, bitter meats, milk, much vomiting, Leeks, fat of Fish, and Coleworts.

Things hurtful to the Eyes.

Garlick, Onions, Radish, Drunkenness, sweet and thick wines, salt meats, Coleworts, all Pulse, Dust, fire, and reading presently after Supper.
